

ST. MARY'S CONVENT, TUNTAPURA

In 1991, Mr. Raju Dore, a pastor from Tuntapur village on the outskirts of Raichur, donated 17.3 acres of land to the Society. However, owing to the village's distance from Raichur and certain difficulties in the land registration process, several years passed before the donor's vision could be realised.

The purpose of this generous donation was to establish a school that would benefit children from the surrounding villages. It was only in 2013 that a small school building was constructed to begin kindergarten classes. The school gradually expanded, adding one class each year until it reached Class VIII. The mission will continue to grow until the children have access to education through the completion of high school.

Situated in a rural area near the Karnataka–Andhra Pradesh border, this mission offers valuable educational opportunities to the young children of the neighbouring villages. The Sisters of St. Ann are committed to dedicating their energies and resources to providing these children with a holistic, value-based education that nurtures their intellectual, social, emotional, and moral development and enables them to build a brighter future.
